

Deliverable 5.2.D

Semantic Reference Implementation

Project reference number	e-Content-22236-LIRICS
Project acronym	LIRICS
Project full title	Linguistic Infrastructure for Interoperable Resource and Systems
Project contact point	Laurent Romary, INRIA-Loria 615, rue du jardin botanique BP101. 54602 Villers lès Nancy (France) romary@loria.fr
Project web site	http://lirics.loria.fr
EC project officer	Erwin Valentini
Document title	Semantic Reference Implementation
Deliverable ID	D5.2.D
Document type	Report
Dissemination level	Public
Contractual date of delivery	M24
Actual date of delivery	15 January 2007
Status & version	Final
Work package, task & deliverable responsible	WP5, USFD
Author(s) & affiliation(s)	Adam Funk (USFD)
Additional contributor(s)	Harry Bunt, Amanda Schiffrin (UTil)
Keywords	LIRICS Reference Implementation, Semantic annotation

1 Introduction

This document describes the data provided in place of a reference implementation of the LIRICS Semantic Annotation Format specified in D4.3. The state of the art in automated semantic annotation is well below that of morphosyntactic and syntactic annotation, so it would not be worthwhile to provide a reference implementation (web service) and platform client for this purpose; consequently the project is not producing an API and annotation software for semantic annotation.

2 Corpus and test suites

Instead, D4.4. will include a large volume of manually annotated data to demonstrate the usability and validity of the LIRICS semantic annotation format for dialogue acts, semantic roles and coreference.
